A Tribute Surendra Agarwal

"Do not go where the path may lead. Go instead where there is no path and leave a trail" wrote Ralph Waldo Emerson, the great American writer and philosopher. Late Sri Surendra Agarwal's life is a great example of a pioneer leaving a trail that so many of us follow today.

Late Surendra Agarwal had established a reputation as a man of great integrity which set him apart among other industrialists. He had a strong commitment to society and wanted to contribute to the upliftment of education. Not only did he believe in serving his ideals, he chose to put his dream into action. He chose Siliguri, which was the city he spent his formative years in, and decided to build an institution that would one day become the benchmark for the education sector in the entire area. Pushing aside bureaucratic red-tape and other challenges he worked tirelessly for two years to give shape to his dream in the form of DPS Siliguri.

Today DPS Siliguri, with its state-of-the-art infrastructure, its unrivalled faculty and students, enjoys a reputation that is unmatched in North Bengal. It is amazing to think that this imposing structure that is shaping the future of the students and the country was the outcome of the vision of Late Sri Surendra Agarwal. Unfortunately, he could not see this dream being fulfilled because of his untimely death on 10th January, 2005. However, thanks to his inspiration and guidance, today Siliguri has one of the best schools in West Bengal.

We Offer

A Personalised Touch With The Little Ones

Children are naturally full of unmixed joy and bliss. This pure joy and bliss are sparks of divinity within the individual self. But sadly enough this joy and bliss is systematically smothered and snuffed out by the environment at home and at school. The largest single factor responsible for robbing children of their joy and bliss is the drudgery involved in learning right from early childhood.

We at DPS, Siliguri, which opens its portals right from Nursery section, try to improve the joy of learning as well as the learning of joy at all stages, though more especially at the Primary level. We accomplish this in our tiny tots through joyous activities like Water games and various other creative games. The curriculum at this stage is structured to eliminate boredom and enhance learning pleasure, thus making learning a joyful experience.

Our classroom, particularly in the Nursery and Kindergarten classes are provided with state-of-the-art facilities, essential for a modern educational institution. Kids are allowed to experience and discover new things instead of being led by the nose. This makes the whole process interesting and a lot less cumbersome.

**“We nurture your child’s
creativity, We spark your
child’s imagination”.**

We Offer The Best Faculty

Our faculty embodies our core values and breathes life into our core purpose. Individually they are dynamic, creative, inspiring and compassionate. Collectively their strength of focus breeds an environment that is nurturing yet disciplined, progressive yet grounded. The teachers are accessible to parents through scheduled one to one meetings and other forms of communications such as parents teacher meeting.

Chosen for their creative and effective teaching skills, our teachers from Kindergarten to High School have access to excellent facilities/resources, customised teaching aids, and multimedia options in learning areas including the Science, Computer and Maths labs. This helps them to accurately interpret teaching learning model.

Our Faculties

We Offer Modern Labs for Learning by Doing

The students of DPS, Siliguri have easy access to all the laboratories which are architecturally beautiful and interesting centres of learning and knowledge through hands on experience of available resources.

- Two Biology Labs
- Two Chemistry Labs
- Two Physics Labs
- Four Computer Labs
- One Maths Lab

All labs are spacious and well equipped with latest equipments which facilitate learning by doing.

We Offer Multi Pronged Methodologies

Our methodology is multi-pronged. It encompasses the diverse ways in which children learn both individually as well as collaboratively.

At DPS, Siliguri our focus is on making learning at School more meaningful. Our students use their knowledge to solve real problems embedded in their immediate context, thereby consolidating their

conceptual understanding and developing skills of application and problem solving and acquiring the ability to analyse, synthesize and critique. The School's curricular framework encourages inventive thinking, guiding children continuously to engage in inquiry, reflection, communication and application of their learning in wider world situations.

We Offer

Modern Evaluation Strategies

The grading and percentage system inhibits growth and development. Good grades are essential but not enough. Every child is talented and meritorious in a unique way. We only need to spot talent and nurture it to its potential.

With the revised assessment structure and examination for class X and to increase the confidence in the students to start preparing for class X Board Examination when they join the Upper Primary Stage in class VI, the CBSE has decided to implement the uniform system of assessment, examination pattern and issue of report cards for classes VI to VIII also on similar pattern. The scheme for classes VI to VIII has been on Term Assessment basis with gradual increase in the learning assessment as the students move forward. This would prepare the students to cover the whole syllabus of the academic year and face the challenges of class X Board Examination and would thus ensure the quality of education.

It thus covers scholastic and non-scholastic aspects of a pupil's activities.

This parallel multi-track evaluation strategy will allow children as well as parents to know the child's qualities and inherent potentials better. It will motivate children to try better to improve their EQ, CQ, and Life Skills, since it will fetch them better scores and official recognitions.

We Offer

Digital, Interactive Classrooms

To make the learning process more Productive, Innovative and Interesting and in keeping with digital demands of the technology driven world, smart classes have been introduced. The ambience of a digital interactive classroom would thus make learning more entertaining, result oriented and complete.
